VARUN KUMAR J A

MCA STUDENT | SOFTWARE DEVELOPER

CAREER OBJECTIVE

MCA student (2024–2026) with 4 months of industry experience as a Software Developer, having worked on Flutter-based mobile applications and backend development using PHP and Node.js, along with basic database handling. Demonstrates strong analytical and problem-solving abilities with hands-on involvement in coding, testing, and maintaining real-world software solutions.

Aspiring to secure a software development internship or entry-level position where I can effectively utilize my technical skills, gain practical industry exposure, and contribute to the development of efficient, scalable, and high-quality applications while continuously enhancing my technical expertise.

PROFESSIONAL EXPERIENCE

February 2024 | **Herin Electronics**, Mysuru, Karnataka.

- **Flutter Application Development:**

  Hands-on experience in designing and developing responsive Flutter mobile applications using Dart, implementing clean UI, navigation, and core features while ensuring smooth performance and maintainable code.

- **Back-End Development Specialist:**

  Skilled in building secure,scalable back-end infrastructures using **PHP**, **Node.js**, and **SQL**, **PhpMyAdmin**, with experience in optimizing systems for high traffic and complex data processing.

Proficient in Development Tools and Version Control

- Experienced in utilizing a wide range of tools including VSCode, PyCharm, PuTTY, Postman, Git, and GitLab for efficient development, debugging, API testing, and seamless version control management.

EDUCATION

Visvesvaraya Technological University (VTU)

UBDT College of Engineering, Davangere, Karnataka

Master of Computer Applications (MCA) | 2024 – 2026

(Currently Pursuing)

AUG 2023

Davangere University, Karnataka, India

Bachelor of Computer Applications, Honors: CGPA: 8.1/10

SKILLS

Programming: Python, PHP, SQL, Dart, C, Java.

Web & App Development:

Flutter, HTML&CSS.

Backend & APIs:

RESTful APIs, PHP Backend, Node.js (Basic)

Tools & Platforms:

Git, GitLab, VS Code, PyCharm,

KEY PROJECTS

- **IoT Dashboard Application**

  Developed a real-time Flutter-based dashboard integrated with Node.js, PHP, and MySQL for monitoring and visualizing live IoT data.

- **Accident Detection and Emergency Alert System**

  Designed a system to automatically **detect vehicle accidents** using sensor data and GPS information, and send **real-time alerts** to emergency services such as police and hospitals with location details.

- **EduSense Gate – Smart Attendance System**

  Developed a **Wi-Fi–based smart attendance system** that automatically marks attendance when students connect to the authorized network, using **Python and SQLite** with a simple user interface for student and faculty management.

- **Coffee Shop Network Management System**

  Designed a **local network system for a coffee shop** to manage customer Wi-Fi access, device connectivity, and basic network monitoring, focusing on **secure access control and network stability**.

AVAILABILITY

- Available for full-time / part-time internships.
- Immediate joining / As per academic schedule.
- Open to on-site / remote opportunities
